April 2015

Enterprise Mobile Management: A Study of Deployment Strategies

A J.Gold Associates Research Report

“This Study was conducted to quantitatively assess the business attitudes and technology requirements for Enterprise Mobile Management (EMM) and Mobile Device Management (MDM) and related services, primarily within the enterprise organization, but also to a lesser extent within the small to medium size company.... We have focused this study primarily on discovering the current and future implementation requirements of organizations for EMM solutions, as well as creating data on what companies think of the vendor solutions they have implemented, including a “vendor evaluation scorecard”.”

Contents

Introduction 10

Study Demographics 11

Industry Segments 11

 Figure 1: Primary Industry Segments of the Respondents 11

Company Size..... 11

 Figure 2: Distribution of respondents by company revenues 12

 Figure 3: Distribution of respondents by company employee size 13

 Figure 4: Segmentation into size categories 14

Respondent Job Functions..... 15

 Figure 5: Distribution of survey respondents by job function 15

Mobile Workforce Size and Device Use 16

 Figure 6: Percentage of workforce uses mobile devices, currently and in the future 16

Types of devices deployed..... 16

 Figure 7: Percentage of workforce uses Smartphones currently and in the future 17

 Figure 8: Percentage of workforce using Tablets currently and in the future 18

Mobile device choices and BYOD 18

 Figure 9: What percentage of Smartphones are BYOD currently and in the future 19

 Figure 10: What percentage of Tablets are BYOD currently and in the future 20

Mobile Device Management.....20

 Figure 11: Percentage of Smartphone being managed currently and in the future 21

 Figure 12: Percentage of Tablets being managed currently and in the future 22

Percentage of devices running on specific operating systems.....22

 Figure 13: Percentage of Smartphones running Android currently and in the future 23

 Figure 14: Percentage of Tablets running Android currently and in the future 24

 Figure 15: Percentage of Smartphones running Apple iOS currently and in the future 25

 Figure 16: Percentage of Tablets running Apple iOS currently and in the future 26

 Figure 17: Percentage of Smartphones running Windows currently and in the future 27

 Figure 18: Percentage of Tablets running Windows currently and in the future 28

 Figure 19: Percentage of Smartphones running BlackBerry currently and in the future 29

Enterprise Mobile Management: A Study of Deployment Strategies

Managing PCs with MDM/EMM.....29

 Figure 20: Extending MDM/EMM to manage Windows PCs currently and in the future 30

 Figure 21: Extending MDM/EMM to manage Mac OS PCs currently and in the future 31

Components of an Enterprise Mobile Management System considered important.....**31**

Mission critical vs. nice to have 31

 Figure 22: “Mission Critical” vs. “Nice-to-Have” components of an EMM solution..... 32

 Figure 23: Components of EMM being used currently and in the future..... 33

Mobile Corporate Email access..... 33

 Figure 24: Type of corporate Email system used for smartphones and tablets - Currently and in the Future 34

Clients used for corporate email..... 34

 Figure 25: Type of mobile Clients used for Corporate Email on iOS smartphones – Currently and in the Future 35

 Figure 26: Type of mobile Clients used for Corporate Email on Android smartphones – Currently and in the Future 36

 Figure 27: Type of mobile clients used for corporate Email on Windows smartphones – Currently and in the Future 37

 Figure 28: Type of mobile Clients used for corporate Email on iOS tablets – Currently and in the Future 38

 Figure 29: Type of mobile Client used for Corporate Email on Android Tablets – Currently and in the Future 39

 Figure 30: Type of mobile Client used for Corporate Email on Windows Tablets – Currently and in the Future 40

Cost and Funding of MDM/EMM Solution**40**

 Figure 31: Cost of EMM/MDM solution per user per year – Currently and in the Future..... 41

 Figure 32: Which group funds the EMM solution 42

Purchasing method 42

 Figure 33: How is the EMM solution purchased – Currently and in the Future..... 43

Evaluating EMM Solutions and Vendors deployed**43**

How many vendor solutions are installed 43

 Figure 34: Number of EMM Vendor solutions installed – Currently and in the Future..... 44

Which Vendor Solutions are deployed..... 44

Enterprise Mobile Management: A Study of Deployment Strategies

Figure 35: Which Vendor solutions are deployed Currently and in the Future 45

Primary EMM solution vendor 46

Figure 36: Which EMM vendor is the Primary solution provider 46

Satisfaction with the Primary EMM vendor 46

Figure 37: Level of satisfaction with Primary EMM solution vendor 47

Possibility of changing the Primary EMM solution provider..... 47

Figure 38: Possibly of changing your Primary EMM solution vendor..... 48

General overview statements on current Primary EMM solution..... 48

Figure 39: General statements about the primary EMM solution vendor..... 49

General questions about the current Mobile Application Strategy..... 49

Figure 40: Questions about the Mobile Application Strategy 50

Method of deployment..... 50

Figure 41: What is the method of EMM deployment – currently and in the Future..... 51

Which groups involved in the selection of the EMM solution 51

Figure 42: Which groups influenced the selection of the EMM vendor 52

Figure 43: Which group was the Primary influencer of the EMM solution chosen..... 53

Evaluating the need for Split Billing. 53

Figure 44: IS Split Billing capability important 54

Figure 45: Will Split Billing capability deployed or will it be deployed 55

Selected questions comparing All responses to specific Vertical Industry responses 56

Choosing the components of an EMM solution considered Mission Critical vs. Nice to Have 56
