Enterprise Mobile Management: A Study of Deployment Strategies

A J.Gold Associates Research Report

“This Study was conducted to quantitatively assess the business attitudes and technology requirements for Enterprise Mobile Management (EMM) and Mobile Device Management (MDM) and related services, primarily within the enterprise organization, but also to a lesser extent within the small to medium size company.... We have focused this study primarily on discovering the current and future implementation requirements of organizations for EMM solutions, as well as creating data on what companies think of the vendor solutions they have implemented, including a “vendor evaluation scorecard”.”

Platinum Sponsor: BlackBerry
Silver Sponsor: AirWatch
Contents

Introduction ........................................................................................................................................10

Study Demographics ..........................................................................................................................11

Industry Segments ...............................................................................................................................11

   Figure 1: Primary Industry Segments of the Respondents ................................................................11

Company Size ......................................................................................................................................11

   Figure 2: Distribution of respondents by company revenues ..........................................................12
   Figure 3: Distribution of respondents by company employee size ..................................................13
   Figure 4: Segmentation into size categories ....................................................................................14

Respondent Job Functions ..................................................................................................................15

   Figure 5: Distribution of survey respondents by job function .........................................................15

Mobile Workforce Size and Device Use ..............................................................................................16

   Figure 6: Percentage of workforce uses mobile devices, currently and in the future ......................16

Types of devices deployed ...................................................................................................................16

   Figure 7: Percentage of workforce uses Smartphones currently and in the future .........................17
   Figure 8: Percentage of workforce using Tablets currently and in the future ..................................18

Mobile device choices and BYOD ......................................................................................................18

   Figure 9: What percentage of Smartphones are BYOD currently and in the future .......................19
   Figure 10: What percentage of Tablets are BYOD currently and in the future ...............................20

Mobile Device Management ..............................................................................................................20

   Figure 11: Percentage of Smartphone being managed currently and in the future .......................21
   Figure 12: Percentage of Tablets being managed currently and in the future ...............................22

Percentage of devices running on specific operating systems .............................................................22

   Figure 13: Percentage of Smartphones running Android currently and in the future ....................23
   Figure 14: Percentage of Tablets running Android currently and in the future ..............................24
   Figure 15: Percentage of Smartphones running Apple iOS currently and in the future ..................25
   Figure 16: Percentage of Tablets running Apple iOS currently and in the future ...........................26
   Figure 17: Percentage of Smartphones running Windows currently and in the future ....................27
   Figure 18: Percentage of Tablets running Windows currently and in the future .............................28
   Figure 19: Percentage of Smartphones running BlackBerry currently and in the future ..............29
Managing PCs with MDM/EMM

Figure 20: Extending MDM/EMM to manage Windows PCs currently and in the future
Figure 21: Extending MDM/EMM to manage Mac OS PCs currently and in the future

Components of an Enterprise Mobile Management System considered important

Mission critical vs. nice to have

Figure 22: “Mission Critical” vs. “Nice-to-Have” components of an EMM solution
Figure 23: Components of EMM being used currently and in the future

Mobile Corporate Email access

Figure 24: Type of corporate Email system used for smartphones and tablets - Currently and in the Future

Clients used for corporate email

Figure 25: Type of mobile Clients used for Corporate Email on iOS smartphones – Currently and in the Future
Figure 26: Type of mobile Clients used for Corporate Email on Android smartphones – Currently and in the Future
Figure 27: Type of mobile clients used for corporate Email on Windows smartphones – Currently and in the Future
Figure 28: Type of mobile Clients used for corporate Email on iOS tablets – Currently and in the Future
Figure 29: Type of mobile Client used for Corporate Email on Android Tablets – Currently and in the Future
Figure 30: Type of mobile Client used for Corporate Email on Windows Tablets – Currently and in the Future

Cost and Funding of MDM/EMM Solution

Figure 31: Cost of EMM/MDM solution per user per year – Currently and in the Future
Figure 32: Which group funds the EMM solution

Purchasing method

Figure 33: How is the EMM solution purchased – Currently and in the Future

Evaluating EMM Solutions and Vendors deployed

How many vendor solutions are installed

Figure 34: Number of EMM Vendor solutions installed – Currently and in the Future

Which Vendor Solutions are deployed
Figure 35: Which Vendor solutions are deployed Currently and in the Future ............................... 45

**Primary EMM solution vendor** ........................................................................................................... 46

Figure 36: Which EMM vendor is the Primary solution provider ......................................................... 46

**Satisfaction with the Primary EMM vendor** ......................................................................................... 46

Figure 37: Level of satisfaction with Primary EMM solution vendor .................................................... 47

**Possibility of changing the Primary EMM solution provider** ............................................................ 47
